Title	Sorting and recycling of household waste
Objectives	<ul style="list-style-type: none"> To create awareness about household waste sorting and recycling, selecting and preparing waste for recycling, and creating waste diversion schemes.
Necessary resources	<p>Picture “Household waste management in Europe” (Appendix 1).</p> <p>Waste samples (collected by students).</p> <p>3 boxes – blue, green, yellow (for example, painted cardboard shoe boxes), 3 A1 sheets, plastic, colored whiteboard markers.</p> <p>Interactive whiteboard (computer, projector).</p>
Time	60 minutes
Step by step instructions	<ol style="list-style-type: none"> 1. Think about the need to sort waste before recycling it. 2. Select waste samples, prepare for recycling. 3. Demonstrates, explains the selection of recyclable waste samples. 4. Discusses the difference in the composition of plastic, glass and paper. 5. In a group, arranges in the correct order and explains the schemes for recycling plastic, glass and paper waste. 6. In a group, write on one sheet of paper the possibilities for reusing materials. 7. Discuss about the possibilities for reusing waste generated in everyday life from the respective material. 8. In a group, write a benefit, argue for it. 9. Discusses the possible benefits for countries of increasing waste recycling and reuse. 10. Individually fills out a self-assessment sheet, reflecting on their own gains in this lesson on waste sorting and recycling. 11. Discusses, compares opinions. 12. A group representative presents their findings.
Reflection	<p>While preparing for this lesson, I learned that waste sorting and recycling</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>In this lesson I learned</p> <p>.....</p> <p>.....</p> <p>.....</p>

	I would like to know more about waste recycling

	I think my family will/will not separate their household waste in the future because
